

Bluebeam Revu 2015 – Project Manager

Bluebeam Revu is a powerful, easy-to-use solution for going digital and using less paper. It is designed for architectural, engineering, and construction (AEC) professionals to efficiently review, manage, and markup PDFs. It provides best-in-class 2D and 3D PDF creation, markup, measurement, and editing tools along with Studio, an integrated cloud-based document and project collaboration tool. For more info please visit www.bluebeam.com.

This half day training session focuses on core introductory features and functionality relevant to supporting AEC project manager or similar professionals. Concepts introduced include: document access, basic editing, markup placement and customization, measurements, markup management, tracking and summary methodologies.

Who should attend?

Project Managers or those who want an overview of the AECO Features of Bluebeam Revu.

Prerequisites

No previous Revu experience required to attend this course; Students should have access to Bluebeam Revu 2015, any edition (Standard, CAD or eXtreme). Students should have a working knowledge of the Microsoft Windows (7, 8.1, or 10) environment.

Questions?

Please call us at 800-336-3375 and ask to speak to our Training Coordinator.

Note:

To receive your certification of completion from Autodesk for this course you must complete the online evaluation form at <http://atcevaluation.autodesk.com/>
