

Bluebeam Revu – Essentials

Bluebeam Revu is a powerful, easy-to-use solution for going digital and using less paper. It is designed for architectural, engineering, and construction (AEC) professionals to efficiently review, manage, and markup PDFs. It provides best-in-class 2D and 3D PDF creation, markup, measurement, and editing tools along with Studio, an integrated cloud-based document and project collaboration tool. For more information, please visit www.bluebeam.com.

This one-day training session focuses on core features and functionality relevant to supporting AEC professionals. Concepts introduced include document access, document editing, markup placement and customization, measurements, markup management, tracking and summary methodologies, and document comparison.

Who should attend?

Students who want to learn the tools and benefits of utilizing the AECO Features of Bluebeam Revu.

Prerequisites

No previous Revu experience required to attend this course; Students should have access to Bluebeam Revu, any edition (Standard, CAD or eXtreme). Students should have a working knowledge of the Microsoft Windows environment.
