MSI Installer Procedure

The **BIMrx** MSI installer (**Microdesk BIMrx - V1.1.msi**) will automatically upgrade any previous product version installed on your machine.

- Installation with the MSI installer package is straight forward. The only action a user must take is to choose which versions of Revit will have BIMRX installed.
- Trial and Standard licenses are available, see the User Guide for more details.
- BIMRX may be uninstalled by going to Windows **Add or Remove Programs** and choosing to remove **Microdesk BIMrx**.

Installer Steps:
