

# BIMrx Cloud Manager Pro

## BIM 360 PROJECT MANAGEMENT SIMPLIFIED

BIMrx Cloud Manager Pro is an essential solution for BIM 360 Administrators to enable full data synchronization between BIM 360 and network or local storage. Save time and increase productivity by scheduling your project uploads, publishing, and downloads, while working within a single UI.

Project managers can define and switch between multiple BIM 360 Hubs, bulk download projects from a single UI instead of swapping between platforms, and schedule jobs to servers across the network. The latest updates to BIMrx Cloud Manager Pro 2.5 furthers the integration between BIM 360 and BIMrx.

**BIM 360 Automation**

**Schedule Upload, Download & Publish**

**Bulk Project Creation & Size Calculation**

**Enterprise-Wide Hub Access & Control**

**Custom Folder Structure & Selection**

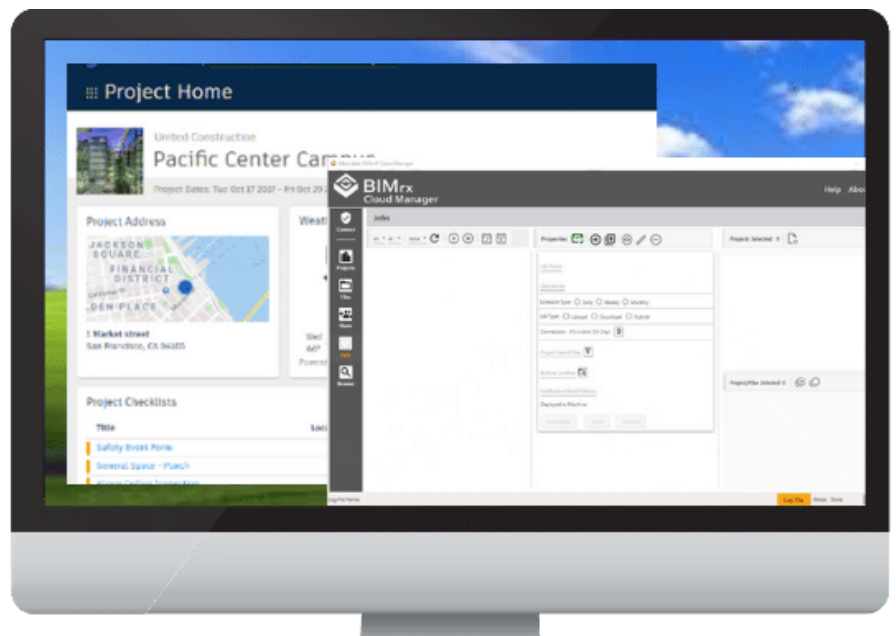

**Deploy Scheduled Jobs Across the Network**

**Export to Excel**

**Copy Job Feature Added to Job Maintenance**

**MICRODESK**

## FEATURES TAILORED TO YOUR BIM 360 NEEDS
